PROJECT DETAILS

- Nehal's Café Website System (Personal Project)**
Description: The Nehal's Café Website System is a web-based application that allows customers to explore the café menu, view different waffle varieties, and get detailed information about products. It provides an attractive and user-friendly interface for customers to browse items easily. The admin can manage menu items, update prices, and add new products dynamically, making the system efficient and easy to maintain.

Duration: 1 months, Solo Project
- Chemical Industry Website (Live Project – Puregrade Resources Private Limited)**
Description: I worked on a live project for a chemical-based company website, where I contributed to the design and development of a professional web platform. The system provides detailed information about various chemical products, services, and industrial applications. It focuses on delivering a user-friendly interface, easy navigation, and efficient content management for showcasing chemical solutions. The website also supports business inquiries and helps the company maintain a strong digital presence in the chemical industry..

Duration: 15 days, Solo Project

- **Real Estate Website (Live Project – Delawala Group)**

Description: I worked on a live project for a real estate-based company website, where I contributed to the design and development of a professional web platform. The system provides detailed information about various residential and commercial projects, property details, company services, and business inquiries. It focuses on delivering a user-friendly interface, easy navigation, responsive design, and proper content presentation for showcasing real estate projects. The website also supports customer inquiries and helps the company maintain a strong digital presence in the real estate industry.

Duration: 3 days, Solo Project

- **Chemical Industry Website (Live Project – Pure Grade Exim LLP)**

Description: I worked on a live project for a chemical and global trading-based company website, where I contributed to the design and development of a professional web platform. The system provides detailed information about various chemical products, industrial raw materials, coal, industrial salt, solvents, product categories, company services, and business inquiries. It focuses on delivering a user-friendly interface, easy navigation, responsive design, and proper content presentation for showcasing chemical and trading solutions. The website also supports customer inquiries and helps the company maintain a strong digital presence in the chemical and trading industry.

Duration: 19 days, Solo Project

- **Real Estate Management System (Delawala Management)**

Description: I worked on a real estate management system for managing property-related business operations in a structured way. The system includes modules such as Masters, Property Master, Property Sales/Booking, Payment Management, Rental Management, Expense Management, Inventory Management, Loan Management, and Reports. It also provides dashboard KPIs, report filters, summary cards, PDF export, Excel export, print options, audit logs, and backup-related features. The main focus of the system was to make property management, customer records, payment tracking, rental details, expenses, and business reports easier, faster, and more organized through an admin panel.

Duration: 2 months, Solo Project

- **ERP System (Automac – Eelcon)**

Description: I worked on an ERP system for Automac, where I contributed to the development and setup of an admin-based business management platform. The system includes an admin login panel and helps manage business operations in a structured and organized way. The main focus of the project was to provide a secure, user-friendly, and professional ERP platform for handling company data, internal processes, and management activities efficiently.

Duration: 1 week, Solo Project
